Profile

A recent graduate from the Institute of Computer Science of the University of the Philippines Los Baños, I am an aspiring Software Developer and Information Security Consultant. As a developer experienced in collaborating with stakeholders and project beneficiaries, I am eager to leverage my technical foundation in both information security and quality assurance by working in a company that finds the synergy between the importance of making robust systems and developing software that is effective.

Experience

Software Development Intern   June 2024 – Aug. 2024
UPLB Computational Interdisciplinary Research Labs (CINTERLABS)   *Los Baños, Laguna, Philippines*

- Developed and refactored dashboards for microbiological datasets gathered on 120+ cave ecosystems profilings using MySQL, ExpressJS, ReactJS, and NodeJS.
- Collaborated with the University of the Philippines Los Baños Museum of Natural History's microbiology researchers, improving interdisciplinary cooperation with environmental researchers.

Software Quality Assurance Intern   Aug. 2023
KUMU, INC.   *Remote*

- Utilized Jira to report bugs and issues in a mobile live-streaming application, contributing to smoother sprint releases.
- Communicated and collaborated with developers in ensuring the successful deployment of new features.
- Performed smoke testing with other interns while following Agile Methodology Principles.

Projects

SEED Laboratory Reports on Cybersecurity | *Bash*   Aug. 2025 – Present

- Produced comprehensive laboratory reports on exploratory simulated environments about Buffer Overflow Attacks, DNS Exploits, Encryption, Environment SetUID, Public Key Infrastructure, Shellshock Attacks, TCP/IP, Cross-Site Scripting (XSS).
- Performed penetration testings and in-depth analysis on malware using Ubuntu and Linux's Command Line.
- Written documentation on the analysis and provided suggestions and insights regarding improving Information Security.

BatSeq | *MySQL, ExpressJS, ReactJS, NodeJS*   Jan. 2025 – Dec. 2025

- Developed a web-based database management system that incorporates bioinformatics tools for the nucleotide dataset of the Museum of Natural History of the University of the Philippines Los Baños.

- Designed and developed the database schema and its corresponding API endpoints for microbial data.

BRICS -Booking and Reservation for Institute of Computer Science | *ReactJS, NodeJS, ExpressJS, MongoDB*   Feb. 2024 – May 2024
- Worked for the frontend development team to create a room reservation system for the Institute of Computer Science - UPLB.
- Developed the user interface using ReactJS and Material UI in collaboration with the UI/UX team.
- Collaborated with the backend team to coordinate the API endpoints of the database schema using NodeJS and ExpressJS with the frontend.
